### TORQUE GUARD

Stop Dangerous, Destructive Kickback in Rotating Machinery with:

#### #TG.2000 Torque Guard

The #TG.2000 Torque Guard is a patent pending safety torque overload device designed for buffers and grinders which can sense the initial impact of an obstruction and LITERALLY, within a millisecond, automatically cut the power to the machine without any operator input.

Mounting bracket

LEDs indicate when power connections are correct. When the center (red) light is lit, connections are incorrect. The two outside (green) LEDs indicate a proper connection.

Sensitivity can be adjusted to suit the conditions and comfort level of the operator.

#### #491.17 Floor Prep Plus Floor Grinder

The second generation Floor Prep Plus grinder is now all steel construction with a myriad of features including:

- Triple-planetary gear box (165 RPM) with steel drive coupler for use as a grinder
- Approved for EZ Scrape attachments
- Vacuum port standard
- Dust containment shroud attachment and optional 40 lb weight kit available
- 1.5 HP Extreme Heavy Duty Motor
- 115 volts 60 Hz
- 50 ft. x 14-3 power cord
- All steel construction
- Ball bearing non-marking wheels
- 112 lbs, Made in the USA

5045 Paris St  
Denver, CO 80329  
(303)-371-7667

## Surface Preparation

### #264 Top Cut Saw

The safer, quicker, more effective way to cut relief joints for wood flooring take up jobs

- Saves time, money..and knees
- Safer than traditional circular saw
- Limits generation of airborne dust

- Capable of cutting wood, concrete board & concrete with the appropriate blade
- Standard 2" vacuum port
- Uses standard 4-1/2 to 6" blades
- Cut depth gauge
- Removable handle for compact transport

Get off your achy knees and away from that dangerous blade!

### #HF1000 Hi-Frequency Floor Stripper

Introducing the HF1000 Stripper; Ultra lightweight, affordable machine that utilizes high frequency direct-drive motor technology, which provides blade actuation up to 3600 strikes per minute. The HF1000 can tackle most vinyl, carpet pad and linoleum jobs.

- Compact & lightweight!
- Can be converted from stand up to handheld for tight spaces!
- Adjustable blade angle allows for comfortable operating position
- Includes self dicing blades for carpet
- High frequency direct drive motor eliminates the need for mechanical drive belts & related maintenance
- Operates at 110V

## Vinyl & Wood Flooring Tools

### #TAP.1000 Tapper Tool

The patented #TAP.1000, new from Taylor Tools, has redefined the wood floor installation process. Gone are the days of countless hours on your knees with a tapping block and mallet. The Tapper Tool allows you to quickly, safely and efficiently hammer in tongue and groover wood floors mechanically in a fraction of the time. It's also great for lace-in work. The Tapper Tool is 3 simple components that attach to any standard SDS drill.

Save your knees, time and money by switching to the Tapper Tool today!
